(54) Telephone with automatic dialing push buttons.

(57) A telephone having a closure removably covering an operation panel on the body of the telephone, and automatic dialing push buttons arranged on the closure for performing an automatic dialing function. Depression of the push button on the closure be-

comes effective when the operation panel is covered with the closure. When the push button is depressed in this state, pre-stored telephone number data is automatically transmitted to telephone lines as dial signals.

FIG.1
